Creating an array

#### Declaring an array

---

```
float[] scores;
```

#### Declaring an array

---

```
float[] scores;
```

Needs initialization

---

```
float[] scores;
```

```
System.out.println(scores[0]);
```

Compilation error

#### Creating an array with array literal

---

```
float[] scores = {7.5f,5.0f,8.5f,6.0f,4.0f};
```

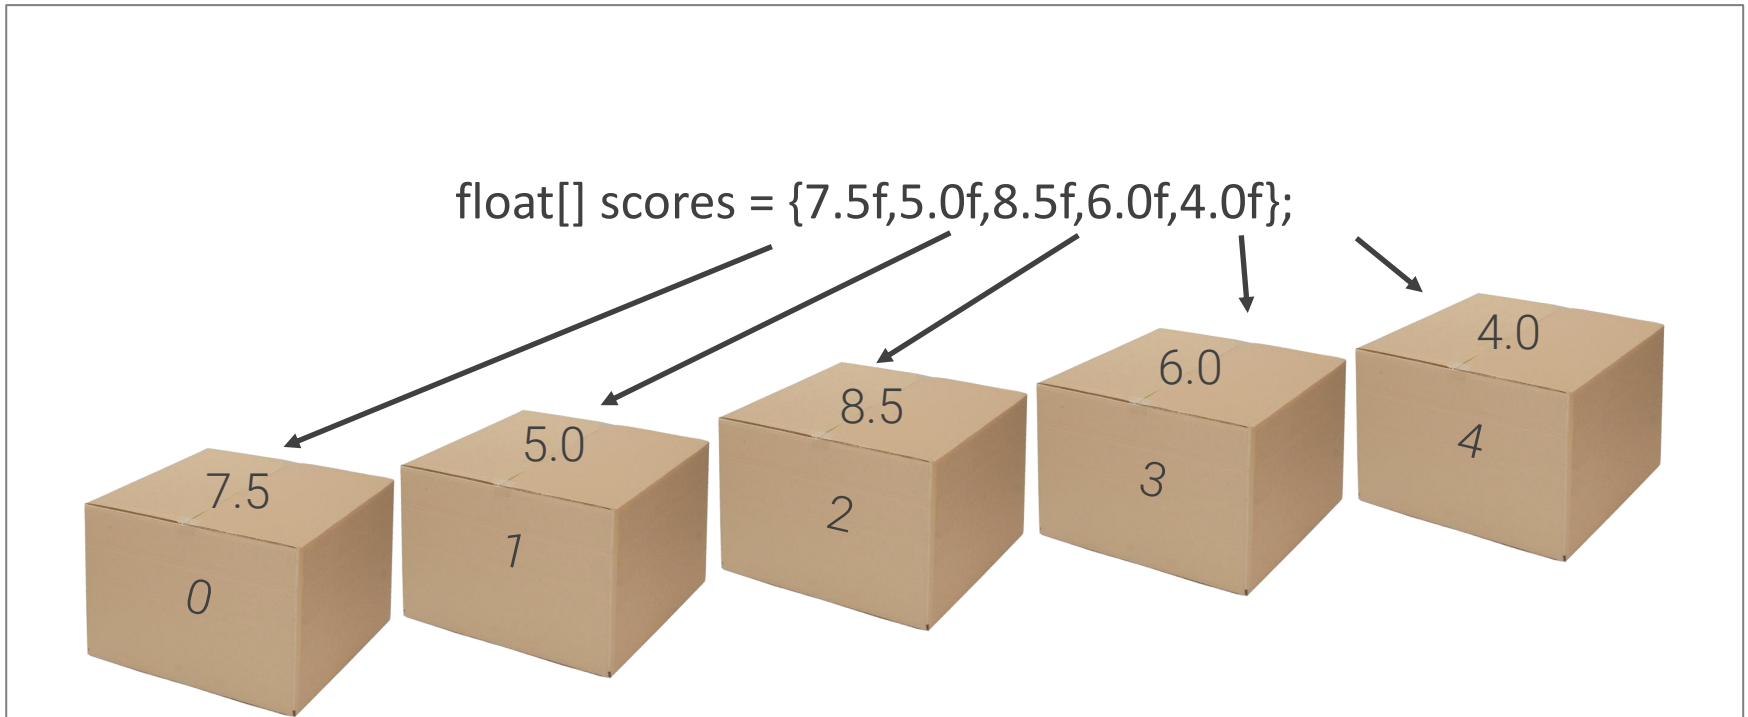

#### Creating an array with array literal

---

```
float[] scores = {7.5f,5.0f,8.5f,6.0f,4.0f};
```

### 3. Creating an array

#### Creating an array with array literal

#### Creating an array with array literal

---

```
float[] scores = {7.5f,5.0f,8.5f,6.0f,4.0f};  
System.out.println(scores[0]);  
//Prints: 7.5
```

#### Creating an array with a default value

---

```
float[] scores = new float[25];
```

#### Creating an array with a default value

---

```
float[] scores = new float[25];
```

#### Creating an array with a default value

```
float[] scores = new int[25];
```

Compilation error

#### Creating an array with a default value

---

```
float[] scores = new float[25];
```

Array length: int number>0

#### Creating an array with a default value

```
float[] scores = new float[25];
```

#### Creating an array with a default value

---

```
float[] scores = new float[25];  
System.out.println(scores[10]);  
//Prints: 0.0
```

#### Creating an array with a default value

```
boolean[] access= new boolean[25];
```

#### Creating an array with a default value

```
char[] qualifications= new char[25];
```

### 3. Creating an array

Creating an array with a default value

```
String[] names= new String[25];
```

“El aprendizaje nunca cansa a la mente”

*Leonardo Da Vinci*
