Introducción a los Entornos de Desarrollo Integrados (IDE)

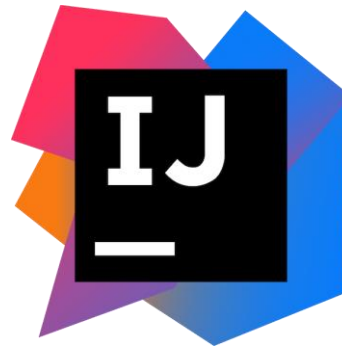

Definición IDE

IDE

- Editor de texto
- Compilador/intérprete
- *Debugger*
- *File Browser*

Ejemplo de uso

“Hello World”

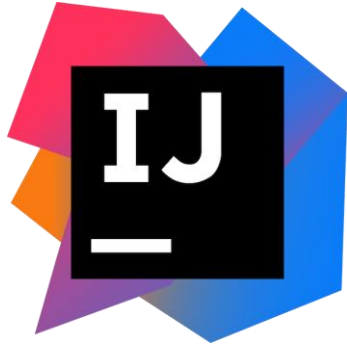

2. Ejemplo de uso

The image displays three screenshots illustrating the development and execution of a Java program:

- Top Left (Finder):** A macOS Finder window showing a file list. The file `HelloWorld.class` is highlighted, showing its size (428 bytes) and type (Anàlisi d'extensió Java).
- Bottom Left (Terminal):** A terminal window showing the execution of the Java program. The command `javac HelloWorld.java` is run, and the output is `Hello World!`.
- Right (IntelliJ IDEA):** The IntelliJ IDEA IDE showing the `HelloWorld.java` source code and the output of the program execution, which is `Hello World!`.

Algunos IDE

3. Algunos IDE

“There are only two kinds of programming languages: those people always complains about and those nobody uses.”

BJARNE STROUSTRUP, Morgan Stanley
