

Method calling

travelDocumentation method

```
public void travelDocumentation(){
      System.out.println("TRAVEL DOCUMENTATION:");
      System.out.println("A driving licence is not accepted as a travel document on
                                                                                     international flights or
domestic flights.");
      System.out.println("Travel documents accepted ar
      System.out.println("A valid passport.");
                                                       travelDocumentation();
      System.out.println("A valid National Identity Card
Area country.");
                                                                                   Method calling
```

travelDocumentation method

```
public void travelDocumentation(){
      System.out.println("TRAVE"
                                   CUMENTATION:");
      System.out.println("A driving
                                          's not accepted as a travel document on
                                                                                     international flights or
domestic flights.");
                                                   , at
      System.out.println("Travel documents ...
      System.out.println("A valid passport.");
                                                       travelDocumentation();
      System.out.println("A valid National Identity Card
Area country.");
                                                                                   Method calling
```

travelDocumentation method

```
public void travelDocumentation(){
   //block of code
}

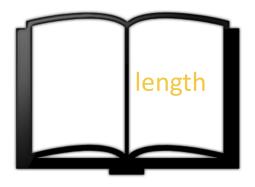

Method definition
```

```
travelDocumentation();

Method calling
```

Method definition

Dictionary: word definition

Method calling

I need to measure the length and the width of my kitchen

Sentence: word in use

travelDocumentation method

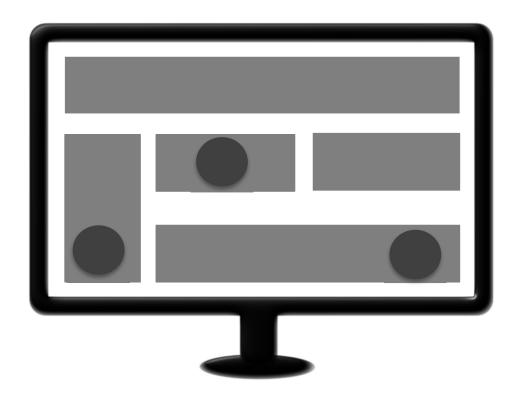

```
public void travelDocumentation(){
   //block of code
}
Method definition
```

```
travelDocumentation();
travelDocumentation();
travelDocumentation();
```

Method calling

LaSalleAir

travelDocumentation();
travelDocumentation();
travelDocumentation();

Dada la siguiente definición del método greeting(), ¿cuál sería la sintaxis para llamarlo?

public void greeting(){
System.out.println("Hello world");
}
CALL:

Dada la siguiente definición del método greeting(), ¿cuál es la sintaxis para llamarlo?

```
public void greeting(){
    System.out.println("Hello world");
}
```

CALL:

greeting();

Dada la siguiente definición del método showBeeps, ¿cuál es la sintaxis para llamarlo?¿cuál es el resultado?

public void showBeeps(){	
for (int i=0; i<2; i++){	
System.out.println("Beep #"+i);	
}	
}	
CALL:	OUTPUT:

Dada la siguiente definición del método showBeeps, ¿cuál es la sintaxis para llamarlo?¿cuál es el resultado?

```
public void showBeeps(){
  for (int i=0; i<2; i++){
    System.out.println("Beep #"+i);
  }
}</pre>
```

CALL:

showBeeps();

OUTPUT:

Beep #0

Beep #1

```
boolean onButton= ?; //It's alarm time?
public void greeting(){
 System.out.println("Hello world");
public void beep () {
 if (onButton){
   System.out.println("BEEP");
```
